Objective

Motivated and detail-oriented professional with a strong academic foundation in Software Engineering and practical experience in machine learning algorithms. Seeking admission to the master's program in Software engineering, Artificial intelligence and Machine Learning to advance my technical expertise and contribute to cutting-edge existing world research.

Education

Bachelor of Science in Software Engineering

American University of Nigeria, Yola-North, Adamawa, Nigeria

Graduation Date: May, 2023

- Relevant Coursework: Data Structures, Algorithms, Artificial Intelligence

Professional Experience

Python Facilitator/ Instructor

ITF/MSTC, Abuja, Nigeria

Oct/2024 – Dec/2024

- Designed and implemented a curriculum for the students that helped them achieve readability and improve their knowledge of python concepts of python.
- Developed a functional working mobile applications using Kivy at the end of the boot camp.
- Ensured that the students maintained an understanding of Python and all collected their certificates.

Computer Software Intern

Obasanjo Space Center, Abuja, FCT, Nigeria

Sept/2023 – Aug/2024

- Conducted valuable experience working alongside industry, professionals, learning best practices and industry standards.
- Prepared detailed reports, power-point presentation and presented findings to team leads.
- Assisted senior team members while developing and executing strategic plans to achieve desired outcomes for space research and geo-spatial technologies.
- Conducted research in testing and training a dataset for a self-driving algorithm.

Technical Skills

- Programming Languages: HTML, CSS, Python, Java, JavaScript
- Tools & Technologies: Git, Firebase, TensorFlow, MySQL, Pandas, NumPy
- Other skills, e.g., Cloud Platforms, Data Visualization, Machine Learning Algorithms

Projects

Self- driving (Autonomous) with Traffic and Road Signs Prediction System

Developed a machine learning model to predict traffic conditions, road signs, cars, and cars, using Python and TensorFlow, achieving a 95% accuracy rate.

Gig Marketplace platform Web-App(Hitmeup!) - Ongoing

Designing a responsive gig marketplace web-app using React and Node.js, integrating payment gateway APIs.

Certifications

- Python Intermediate, SoloLearn, July 2023
- Google Digital Marketing Certificate, Google, October/2023

Extracurricular Activities

- Member of Association of Computing Machinery, May 2020 – Mar 2023 Organized specific activities, like coding hackathons, workshops on AI.
- Volunteer Mentor, AUN Community Service, Sept 2022- Mar 2023 Mentored rural school students on Mathematics and English.

Languages

- English (Fluent)
- French (Beginner)
